## Section 1. Amendments to the Claims

Claim 1. (Previously amended): Ammunition feeder comprising:

- 5                   a handle portion;
- a head portion;
- said handle portion integrally attached to said head portion;
- said handle portion made of injection molded plastic to a flat elongate
- shape approximately seven and one half inches long, one inch wide and one eighth of an inch
- 10   thick;
- said handle portion tapering to approximately one half of an inch at the junction
- point between said handle and said head;
- said handle having raised portions to help the user maintain his grip on
- said handle;
- 15                   said head portion attached at a right angle to said handle and shaped to
- allow the end of an ammunition belt to snap onto said head portion;
- said head portion being approximately cylindrically shaped and approximately
- the diameter of a bullet contained in said ammunition belt; and
- said head portion being flattened longitudinally on one side and including a
- 20   longitudinally disposed recess so that the feed pawl of a machine gun is not activated by said
- head portion.

2. (Currently amended): Ammunition feeder as claimed in claim 1 wherein said head portion

mates with a US Army standard issue M60-machine gun.

25   3. (Previously amended): Ammunition feeder as claimed in claim 1 wherein said head portion

links easily to a 7.62 mm ammunition belt.
